

## Extraction Enterprise System Requirements

This document provides the detailed system requirements for the Resume Mirror Extraction Enterprise solution. It is divided into the following principal sections:

- **Extraction Enterprise:** Extraction Enterprise system hosted by Talent Technology; you access the system via SOAP requests.
- **Extraction Enterprise Tools:** Optional components of Extraction Enterprise.

### Extraction Enterprise

The requirements in this section apply to systems that use Talent Technology's hosted services for Extraction Enterprise.

#### Required Hardware

- None

#### Required Software

- **For integration with an ERP solution:** supported ERP solution, such as PeopleSoft, Oracle, or SAP.

Or

- **For a custom integration:** any programming language that supports Simple Object Access Protocol (SOAP) or HTTP to work with web services. These include, but are not limited to, C#, Java, VB, ColdFusion, Delphi, PHP, ASP, and ASP.NET.

#### Required Configuration

- Firewall rule to allow integration server(s) outbound access to our hosted web services via either port 80 or port 443 (using SSL)
- Proxy server access allowed through from the Outlook Add-in or Extraction Enterprise Listener

### Extraction Enterprise Tools

#### Office Add-In

The Office Add-in is installed in a user's desktop Microsoft Outlook, Microsoft Word, and/or Microsoft Internet Explorer application, and is used to submit resumes directly from e-mails in Outlook, or any file that can be opened in MSWord or Internet Explorer to Extraction Enterprise.

#### Required Software

- Windows 2000 SP4 or higher, or Windows XP
- Microsoft .NET Framework 1.1
- Microsoft Office 2003 if using Outlook or Word Add-ins
- Microsoft Internet Explorer 6.x or 7.x if using Internet Explorer Add-in

#### Required Configuration

- Outlook Add-In must be installed by a user with administrator rights to the computer

- *Extraction Enterprise Outlook Add-in System Administration Guide*

## Extraction Enterprise Listener

This is an optional component of Extraction Enterprise. The Listener is required if you plan to do any of the following:

- use Extraction Enterprise to process direct or forwarded e-mails
- use Extraction Enterprise to process FTP batches
- use the Outlook Add-In
- integrate Extraction Enterprise with PeopleSoft 8.3, 8.8SP1, 8.9, or Oracle iRecruitment.

**Note:** The Extraction Enterprise Listener is not required for SAP integrations.

#### Required Hardware

- Recommended Production Server
  - Intel P4 or Xeon CPU
  - 1-2GB RAM
  - Mirrored HDD (RAID 1), 18GB or higher, 10K RPM or higher
- Talent Technology recommends having a separate development/pre-production server in order to test and apply new patches and versions before migrating to the production environment.

#### **Required Software**

- Windows 2003 (highly recommended) or Windows 2000 Server SP4 or higher
- Microsoft .NET Framework 1.1

#### **Required Configuration**

- Extraction Enterprise Listener must be installed by a user with administrator rights to the computer. It is a Windows service so it may be run by a different user after installation.
